DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to a liquid crystal display apparatus having different gap regions, classified in class 349, subclass 107.
- II. Claim 19, drawn to a method of manufacturing a liquid crystal display apparatus having different gap regions by means of forming spacers, classified in class 349, subclass 156.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the spacer formation as claimed in invention I can be made by means of photolithography or deposition as opposed to the method claimed in invention II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
